## Cleaning Instruction During Season Care:

- Before cleaning, be sure to turn off and unplug the unit.
- Keep the fan clean. Carefully wipe the unit with a soft, damp cloth. Please be very cautious near the motor.
- DO NOT immerse the fan in water and never allow water to drip into the Motor Housing.
- Never use gasoline, benzene or thinner. This will damage the surface of the unit.
- After cleaning, be sure to completely dry the unit with a cloth or towel.

## After Season Care:

- Your fan can be stored in the off-season.
- Before putting the fan in storage, clean it thoroughly, cover it with 

  vinyl bag, and store it in 

  cool and dry place. We recommend using the original (or appropriately sized) box.
